DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of the product in the reply filed on December 1, 2005 is acknowledged.
2. Applicant's election of the species requirement in the reply filed on December 1, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
3. Claims 31-39 and claims 6-8,14,15,21-23,29, and 30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, respectively, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 1, 2005.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the ribs of the base extending radially outwardly from the skirt on opposed sides of the passage must be shown or the feature(s) canceled from the claim (40). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views

Art Unit: 3727

of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

5. The disclosure is objected to because of the following informalities: at page 3, line 15, "base 30" should read -- base 28 --. Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. Claim 40 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the disclosure as originally filed for "ribs that extend radially outwardly from said skirt on opposed sides of said passage". This is a new matter rejection.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-3,10,11,16-18,25,26, 4,9,12,19,24,27, 5,13,20,28, 40 and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nozawa et al. (US 5,423,442) in view of Varlet et al. (US 5,979,681).

Art Unit: 3727

Nozawa teaches a hinged closure comprising a deck having a dispensing opening and a skirt and an integrally molded lid pivotally attached to the deck. Nozawa does not teach a child-resistant latching mechanism.

Varlet teaches it is known to provide a pivotal child-resistant latching mechanism on one of the lid and deck and associated axial passage on the other of the deck and lid. See figs. 2b and 3b.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the child-resistant feature of Varlet to the closure of Nozawa. Doing so helps prevent opening of the closure by a small child.

Regarding claims 4,9,12,19,24, and 27, the examiner takes Official notice that it is well established to provide a cam surface for allowing two surfaces to more smoothly and easily move in relation to one another. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to apply cam surfaces to the ledges to allow the tabs to move over the ledges more smoothly and easily in the closing direction of the lid.

Regarding claims 5,13,20,28, 40 and 41, the examiner takes Official notice that it is well established to provide strengthening ribs to a closure structure. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to apply ribs to the tab and the base to strengthen the structure and resist breakage of the tab.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Various prior art closures teaching features similar to those disclosed and/or claimed are cited for their disclosures.

10. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (571) 273-8300. This practice

may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

11. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. _____ is being facsimiled to The U.S. Patent and Trademark Office via fax number 571-273-8300 on the date shown below:
